

ABUBA RASHIDA

Software Engineer

Uganda (Remote) | +256 760 137 856 | rashidaabuba93@gmail.com | linkedin.com/in/abuba-rashida-1b117537b | github.com/Rashida-2005 | abuba-rashida-portfolio.vercel.app

PROFESSIONAL SUMMARY

Software Engineer with a Refactory Academy Software Engineering Certificate and hands-on apprenticeship experience building full-stack products end to end. Skilled in Python/Django and NestJS/TypeScript backends, React Native mobile development, and PostgreSQL/Supabase data layers. Experienced integrating Africa-specific payment and identity systems, including Mobile Money, Paystack, and Didit ID verification. Comfortable owning a feature from database schema through CI/CD deployment. Seeking a backend-focused or full-stack engineering role.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, SQL

Frameworks: Django, NestJS, React Native, Express

Databases & Backend: PostgreSQL, Supabase, Prisma, REST APIs

DevOps & Tools: Git/GitHub, GitHub Actions (CI/CD), PM2, Linux server deployment

Payments & Integrations: Mobile Money, Paystack, Didit ID Verification

Cloud: Microsoft Azure Fundamentals (AZ-900)

EXPERIENCE

Software Engineering Apprentice *2025 – June 2026*

Ijeoma Ltd — Canada (Remote)

- Built and maintained Amorive, a cross-platform dating/social app with a NestJS backend and React Native frontend, supporting two distinct user roles (Sparks and Guides).
- Implemented Didit-based identity verification, replacing an earlier AI-based verification approach, improving reliability of user onboarding.
- Designed a real-time user presence and online-status system, and built guide pricing logic for the platform's paid service model.
- Integrated Mobile Money and Paystack for subscription payments, and built a manual review/admin flagging workflow with a support contact endpoint.
- Diagnosed and fixed a production bug in the coach/guide review flow caused by a frontend navigation chain passing an incorrect identifier to the backend.
- Led a platform-wide user role rename (Coach → Guide/Spark), including a Supabase database migration and resolution of downstream TypeScript/ESLint errors.
- Managed deployment via GitHub Actions CI/CD pipelines with PM2 process management on a Linux server backed by Supabase PostgreSQL.

PROJECTS

Amorive — Dating & Social Platform

- Developed a cross-platform mobile dating application using React Native, NestJS, and Supabase, implementing secure authentication, presence tracking, guide pricing, and Mobile Money/Paystack subscription payments to deliver a scalable MVP.

Mayondo Wood & Furniture Management System

- Engineered a full-stack inventory and order management platform using Python, Django, and PostgreSQL, enabling real-time stock tracking, customer management, and order processing.
- Live demo: sense-1-0jzx.onrender.com | Source code: github.com/Rashida-2005/sense

Hotel Management System

- Built a booking and administration system for hotel operations, covering room availability, reservations, and guest records.

EDUCATION & LEADERSHIP

Software Engineering Certificate²⁰²⁵

Refactory Academy

High School Education

UACE — St. Katherine High School | UCE — Lira Integrated School

Product Owner

- Managed product backlog, defined requirements, and collaborated with development teams in Agile sprints.

High School Leadership

- Demonstrated responsibility, teamwork, and organizational skills through various leadership roles.

CERTIFICATIONS

- Software Engineering Apprenticeship
- Software Engineering Certificate — Refactory Academy
- Python Certificate
- Soft Skills — Brighter Monday
- Microsoft Certified: Azure Fundamentals (AZ-900)
- Agile/Scrum Certified
