TECHNICAL SKILLS

PROFESSIONAL

Programming Languages:

Python, JavaScript (Node.js, NestJS), HTML, CSS

Frameworks & Libraries:

Django, React.js, React Native

Database & APIs:

PostgreSQL, Supabase, Postman, Swagger

Tools & Platforms:

Git, GitHub, VS Code, Figma, Visily, Render

Concepts & Methodologies:

Agile Development, Data Structures, Algorithms

PROFESSIONAL SUMMARY

Detail-oriented and passionate Software Engineering apprentice specializing in full-stack development. Skilled in building scalable web applications, responsive user interfaces, and efficient backend systems. Proficient in modern technologies including React, Django, Node.js, and PostgreSQL. Strong foundation in data structures, algorithms, and Agile methodologies. Committed to developing impactful digital solutions and continuously expanding technical expertise in the tech industry.

PROJECT EXPERIENCE

Mayondo Wood and Furniture Limited System

Technologies: Python, Django

- Built a system to manage inventory, orders, and customer interactions.
- Improved operational efficiency and supported business scalability.
- Enhanced data organization and workflow processes.

Hotel-Komar Management System

Project - Acedemic/Personal

Technogolies: Django, Python, HTML, CSS

- Developed a hotel management system to automate room booking and customer management.
- Implemented an online reservation system to improve customer experience and operational efficiency.
- Streamlined backend processes for booking and payment handling.
- Enhanced overall service delivery and guest satisfaction.

EDUCATION

- Apprenticeship in Software Engineering (Current)
- Certificate in Software Engineering with Python
- Certificate in Soft Skills – Brighter Monday
- Microsoft Azure Certification
- Uganda Advanced Certificate of Education (UACE)
- St. Katherine Secondary School | 2023 – 2024
- Uganda Certificate of Education (UCE)
- Lira Integrated Schools | 2018 – 2022

Dream Tech Agency Platform

Project - Personal
Technologies: HTML, CSS

- Developed a web application to establish credibility and attract collaborators and clients in the tech space.
- Built a responsive and user-friendly interface to improve accessibility and engagement.
- Designed a platform that inspires and guides users into the technology field.

Software Engineering Apprentice

Built full stack web and mobile application in a structured professional environment.

Collaborated with distributed teams via Git and Github, applying branching strategies, pull request with clean code.

Participated in Agile/Scrum ceremonies including sprint planning, daily standups and interactive cycles.

Implemented CI/CD pipelines to automate testing and streamline deployment workflows.

Delivered responsive, scalable web and mobile applications with a strong focus on usability.

LEADERSHIP & ACTIVITIES

Held leadership roles in high school, demonstrating responsibility, teamwork, and organizational skills. Product Owner – Agile Sprint projects

- Served as Product Owner during software development sprints.
- Defined and prioritized product requirements and managed product backlogs.
- Collaborated closely with developers and Scrum Masters to deliver project objectives.
- Facilitated communication between stakeholders and development teams.
- Participated in sprint planning, reviews, and retrospectives.
